

A plant based, biodegradable, non ozone-depleting, non-flammable solvent that is actually more powerful than acetone in its effectiveness to dissolve resin.

Applications:

- Cleans squeegees, roller brushes, tools.
- Flushing spray equipment.
- Retain for keeping pot & parts safe from cured resin.
- Quickly cleans resin spills.
- Displaces water, hence good for long-term parts protection from corrosion.
- Reactive diluent can be added to resins in small quantities to reduce viscosity.
